Java/sr Ui- Developer Resume

Minneapolis, MN

SUMMARY:

○ 7+ years of experience in Analysis, Development, Support and Implementation of Web based applications with **Java** Technologies.

○ Strong understanding and excellent skills in developing, professional, **AJAX** driven elegant enterprise web application using **HTML / HTML5** , **CSS / CSS3** , **XML** , **JSON**, **Bootstrap** , **JQUERY** , and various **Java** and **JavaScript** design patterns.

○ Extensive experience in developing web pages in improving performance, maintainability and making them cross browser compatible using **HTML** , **HTML5** , **CSS** , **CSS3** , **JavaScript** , **JQUERY** , AJAX, JSON, **Angular 4** , **Angular** 2, **ReactJS** , **NodeJS** , **BackboneJS** etc.

○ Involved in the Agile based environment and participated in Scrum session and Waterfall methodologies.

○ Created **RESTful** clients for various web - services involving both **JSON** and **XML** .

○ Experience with Service Oriented Architecture - SOA for Web Services using SOAP.

○ In-Depth Knowledge working with **MVC** architecture frameworks like **AngularJS** and **BackboneJS** .

○ Excellent skills in developing single page applications (**SPA's**) using **AngularJS** , **ReactJS** and BackboneJS.

○ Working knowledge on **JavaScript** and **JavaScript** frameworks backbone.js, **NodeJS** and **AngularJS** .

○ Accomplished implementing different features of **Bootstrap** .

○ Deep knowledge of **AngularJS** practices and commonly used modules based on extensive work experience.

○ Developed AJAX functionalities using frameworks like JSON and **jQuery** .

○ Wrote application level code to interact with the backend (**Java**) code AJAX and JSON. Also wrote code to consume the JSON data as a part of **JQUERY** AJAX calls and update the **DOM** .

○ Skilled in developing MVC frame work-based websites using Struts 1.x/2.x, Spring.

○ Thorough knowledge in Responsive Web Design.

○ Exposure to User Acceptance Testing (**UAT**) and Accessibility Testing.

○ Ability to write clear, well-documented, well-commented and efficient code for web development.

○ Great problem identification skills through **JUnit** , **Log4j** .

○ Proficient in RDBMS concepts including writing Stored procedures using TSQL in MS SQL Server and good experience on PL/SQL in Oracle 8i/9i/11g and Access to include Physical Design and Logical DB.

○ Knowledge in Graphic and User Experience Design and Transforming Web/Graphic Designer prototypes into hand-coded **HTML** , specifically emphasizing accuracy and efficiency & adhe

W3C established web standards with respect to maintaining cross-browser/cross-platform compatibility and delivering final page templates, including optimized images.

○ Involved to create the User Interactive web pages in a professional manner using web technologies like **HTML5** , **XHTML** , and **CSS3** based on the W3C and ADA standards.

○ Developed page layouts, Navigations and presented designs and concepts to the clients and the management review.

○ Developing Frontend web applications using **HTML5, CSS3, Bootstrap , SASS, JavaScript, React JS, Redux.**

○ Experience with Building and maintaining React Single Page Applications (SPA).

○ Building reusable React components.

○ Used **ECMAScript (ES6),JSX** with React JS for developing components.

○ Experience with Boilerplate configurations and libraries.

○ Developed CSS style sheets to give gradient effects like page layouts, navigation and icons.

○ Experience on implementing the **React JS** in creating **animations** based on CSS classes.

○ Ability to apply **W3C** web standards with great skills in achieving the best cross-browser user experience for sake of long-term user retention and engagement. Experience with Browser testing, knowledge of cross-browser/cross-platform compatibility.

○ Experience in using **TFS** , **GIT** , **SVN** , and Visual SourceSafe (**VSS**) to provide source code management.

○ Strong experience with Search Engine Optimization (**SEO**) principles and Cross Browser Compatibility issues (IE, Firefox and Safari), graphic optimization for the web, including browser-safe palettes and file size management.

○ Well knowledge of various frameworks of **JavaScript** like **jQuery** , **jQuery** UI and **jQuery Mobile** .

○ Hands on experience with **NoSQL** Databases like **MongoDB** .

○ Experienced in using Front End editors like **Sublime Text2, Brackets, Notepad Eclipse IDE, NetBeans, Developer Tools, Edit Plus, JSfiddle, WebStorm.**

○ Experience working with testing tools like **Firebug, Firebug Lite, Chrome or Safari web inspectors and IE Developer Toolbar.**

○ Experience applying the latest software development approaches including MVC, event driven applications using **AJAX, Object Oriented OO JavaScript, JSON and XML.**

○ Experience in writing complex database queries, stored procedures, and triggers using **SQL, SQL Plus, PL/SQL.** Strong Skills in Database Design, Process and Data Models.

○ Knowledge and experience in RDBMS like **Oracle, My SQL, MS SQL Server, DB2** and MS Access.

○ Experience in using Version control tools like **CVS, Clear Case and VSS.**

○ Flexible team player with outstanding problem-solving acumen, strong communication, and interpersonal skills, with an ability to convey concepts/requirements between technical and non-technical stakeholders.

TECHNICAL SKILLS:

UI Web Technologies: HTML5, CSS3, XML, AJAX, JSON, UI Concept Modeling/Wire framing, Bootstrap, SASS, Gulp.

UI Frameworks: Angular 4, Angular 2, AngularJS, BackboneJS, NodeJS, ReactJS, JQUERY, JavaScript

IDE, HTML Editor: Sublime text 3, Eclipse IDE, Notepad++, Edit Plus, WebStorm.

Version Control: GIT LAB, SVN, Perforce.

Debugging Tools: JIRA, Rally, Firebug, JUnit, Jasmine, Karma.

Web/App Servers: WebLogic, Apache Tomcat, HTTP Web Server.

Methodologies: Agile, Waterfall, Rational Unified Process (RUP).

Database: MySQL, SQL Server, Oracle11g/10g, SQL 2008/2012, PL/SQL.

Operating Systems: Windows XP/7/8, Mac OS, UNIX and LINUX.

PROFESSIONAL EXPERIENCE:

Confidential, Minneapolis, MN

Java/Sr Ui- developer

Responsibilities:

- Involved in web designing using **HTML 4/5, XHTML, CSS 2/3, JavaScript** and extensively used Table less Design in **CSS for positioning.**
- I was working on the payments platform at Disney mainly working on building the templates for these pages using HTML5, building Angular 2 components using typescript and services to consume data from back end REST API's.
- Developed responsive designs using **HTML5** and **CSS3** for hand held devices.
- Designed and developed code for table less web interfaces **using XHTML, CSS, DOM and JavaScript.**
- Expertise in working with the **JavaScript** frameworks like **JQUERY** and **Angular4.**
- Involved in migrating from **AngularJS** to **Angular** 2.0 and built **Angular** components usingtypescript.
- Hands on experience working on **Angular** 4.0/2.0 services, modules and component directives.
- Experience with **CMS (content management system)** tool for putting in the and managing the content for **Disneyguest facing** and **cast facing campaigns.**
- Developed the functionality for communicating between the modules mostly involved in VIEW and CONTOLLER section of MVC pattern for CMS project, it includes **HTML5, CSS3, JavaScript, jQuery** and AJAX which were used for UI development.
- Developed application using **Spring MVC, JSP, JSTL** and **AJAX** on the presentation layer, the business layer is built using spring and the persistent layer uses **Hibernate.**
- Designed data formatted web applications using **HTML, DHTML, XHTML** and **CSS** and deploy the script by client-side scripting using **JavaScript.**
- Developed all the page styles by using **Bootstrap** and **SASS** instead of **CSS** to gain a better structure of the stylesheets for a maintain purpose.
- Implemented latest **HTML5** and **CSS3** features like creating various effects, shading, 2D 3D animation, Shapes, Handling multimedia files and many others.
- Responsible for designing Front-side of the website like embedded graphics, and interactive documents using **JavaScript, XML, HTML and CSS.**
- Developing Frontend web applications using **HTML5, CSS3, Bootstrap , SASS, JavaScript, React JS, Redux.**
- Experience with Building and maintaining React Single Page Applications (SPA).
- Building reusable React components.
- Used **ECMAScript (ES6),JSX** with React JS for developing components.
- Experience with Boilerplate configurations and libraries.

○ Developed CSS style sheets to give gradient effects like page layouts, navigation and icons.

○ Experience on implementing the **React JS** in creating **animations** based on CSS classes.

○ Integrated **Redux** Framework with React to handle large chunks of data for the better performance.

○ Used **CSS** Sprites to decrease the number of **HTTP** requests and load time of web pages.

○ Designed dynamic client-side **JavaScript** codes to build web forms and simulate process for web application, page navigation and form validation.

○ Created **Images, Logos** and **Icons** used across web pages using **Adobe Flash, Dream weaver, and Photoshop.**

○ Created web services and desktop applications to access and display data needed by support teams using, **Ajax**, **JavaScript**, **jQuery**, **Backbone.js, Angular. Js, NodeJS, Java**, **CSS** and **HTML**.

○ Built data visualizations to monitor file server load, Web server speed, Data Processing **jQuery** and **MySQL.**

○ Developed a modern web workflow using **Grunt, Bower, Browserify** as a part of my project.

○ Maintained cross browser compatibility, implement **Responsive Design** using **Twitter Bootstrap**, custom media queries, etc.

○ Created dynamic **HTML5** pages with **JavaScript** and **CSS3** for their Intranet software product.

○ Used **JSON** format to serialize and transmit structured data over network connection.

○ Implemented and used **web services** with the help of **WSDL, SOAP, REST** and **JAX-WS** to get updates from third-parties.

○ Designed various tables required for the project in **Oracle** database and used the **Stored Procedures** in the application.

○ Developed consumer-based applications using **Python, Java Script, jQuery, HTML and CSS.**

○ Used **Dreamweaver, Photoshop, Flex** for implementing application and designing graphics and images.

○ Developed presentation and UI components using **JSP**, **Struts Tag Library, AJAX**, **Java Beans**, **XML**, **HTML**, **CSS**, **Custom Tag** and **JavaScript**.

○ Developed enhancements to **MongoDB** architecture to improve performance and scalability.

○ Expertise in using npm and bower package management for light weight business and manage node packages such as mongoose/mongo for **MongoDB** connections.

○ Implemented build scripts using **ANT** to create WAR and deploy in application server.

○ Used **Log4j** for External Configuration Files debugging and added unit tests to the code base using **Jasmine**.

○ Developed **ANT** scripts and used **Maven** tool to build and deploy J2EE Applications.

○ Prepared Unit and System Testing Specification documents and performed Unit and System testing of the application.

○ Reviewed the code for ensuring adherence to **Java** coding standards.

○ Worked with the team of architects and back-end Developers to gather requirements and enhance the application functionality and add new features.

Environment: HTML5, CSS3, Angular 4, Angular 2, NodeJS, JavaScript, AJAX, Bootstrap, Jasmine and Karma, JavaScript, XML, DOM, Java Beans, JSON, Ajax, Spring MVC, Hibernate, Oracle, Pl/SQL, Web Services, jQuery, Backbone.js, ReqUIre.js, NodeJS, Maven.

Confidential, Pittsburgh, PA

Sr Ui developer

Responsibilities:

- Analyze the software requirements to determine feasibility of design within time and cost constrains.
- Migrated from **AngularJS** to **Angular 2.0** and involved in building **Angular** components using typescript.
- Responsible for setting up **AngularJS** framework for UI development. Developed **HTML** views with **HTML5** , **CSS3** , JSON and **AngularJS** .
- Using **AngularJS** created custom directives for data manipulations and to display data in company standard format in UI.
- Improved dependency injection for modular development and component isolation using **AngularJS** .
- Developed page layouts, navigation and icons.
- Used **AngularJS** for rich Used Ajax effectively to create pagination and with client end events like quick search.
- Created **HTML** mockups for mobile as well as Tablet devices as per UID using **CSS3** and **HTML5** for both landscape and Portrait view.
- Craft graphic elements, assets, and visual treatments that adapt and flow with responsive design systems.
- Designed and Developed User Interactive UI of web pages with the help of **HTML5, HTML, CSS3, CSS, JavaScript, jQuery, Bootstrap and AJAX.**
- Developing Frontend web applications using **HTML5, CSS3, Bootstrap , SASS, JavaScript, React JS, Redux.**
- Experience with Building and maintaining React Single Page Applications (SPA).
- Building reusable React components.
- Used **ECMAScript (ES6),JSX** with React JS for developing components.
- Experience with Boilerplate configurations and libraries.
- Developed CSS style sheets to give gradient effects like page layouts, navigation and icons.
- Experience on implementing the **React JS** in creating **animations** based on CSS classes.
- Involved in the creation of interface to manage user menu and Bulk update of Attributes using **AngularJS, NodeJS, EXTJS** and **jQuery**.
- Involved in developing **XML, HTML, and JavaScript** for client-side presentation and, data validation on the client side with in the forms.
- Developed application using **Spring MVC, JSP, JSTL** and **AJAX** on the presentation layer, the business layer is built using spring and the persistent layer uses **Hibernate.**
- Configure the Sprites and in corporate the best SEO practices to make the website Google friendly.
- Prototyping the new features and ideas using **HTML, CSS SASS** and **AngularJS.**
- Used various libraries of **JavaScript** like **jQuery**, **NodeJS** to develop User Interface of web pages.
- Worked on Unit testing, Web Application Testing and end to end testing using frameworks like **Mocha, Chai.**
- Created **Master Pages, CSS Styles Sheets and Integrated** to Silver light and got approval from Business Stake holders.

○ Used **Web Services** like **REST** and **SOAP** for transmission of large blocks of **XML data over HTTP.**

○ Designed the email blasts using Adobe Software and then implemented them using **HTML and Java script.**

○ Created **HTML** navigation menu that is role-based menu items changes dynamically, derived from the database in the form of **XML.**

○ Used **jQuery** core library functions for the logical implementation part at client side for all the applications.

○ Knowledge on JavaScript libraries such as Handlebars.

○ Updated user interface, changing from proprietary UI code to a native Windows application **on PCs** or **on UNIX**, both sharing the same codebase.

○ Designed and developed User Interface Web Forms using **Adobe Flash, CSS, Dreamweaver,** and **JavaScript**.

○ Used **AJAX** for implementing dynamic Webpages where the content was fetched via API calls and updated the **DOM JSON** Parsing.

○ Designed various tables required for the project in **Oracle 10g** database and used the **Stored Procedures** in the application.

○ Involved in designing test plans, test cases and overall **Unit testing** of the system.

○ Used **Log4j** for External Configuration Files and debugging.

○ Used **JUnit** for debugging the application.

○ Designed and development of many **PL/SQL** batches using **JAVA** with connectivity to Oracle for data maintenance and handling.

Environment: **HTML**5, CSS3, JavaScript, Python, jQuery, Ajax, Web Services, Oracle, JSON, PL/SQL, AngularJS, Angular 2, NodeJS, BackboneJS, XML, Adobe Flesh, Dreamweaver, DOM, PL/SQL, Oracle, Windows, JUnit, SVN and GULP.

Confidential, Austin, TX

web Developer

Responsibilities:

○ Created web pages using**HTML5, CSS3, JavaScript, Jquery, Ajax** and **angular Js.**

○ Involved on working with cascading style sheets like **CSS Background**, **CSS Layouts**, **CSS Layouts**, **CSS positioning, CSS text, CSS margin, CSS padding, CSS table, Pseudoclasses, Pseudo elements** and **CSS behaviors** in **CSS3.**

○ Involved in developing **HTML** and **JavaScript** for client side presentation and data validation on the client side within the forms.

○ Worked on 5 verticals of an application on **Agile**base development cycle with a weekly release schedule.

○ Involved in deep understanding of **JavaScript** and **NodeJs.**

○ Worked with **BOOTSTRAP** to develop web pages**.**.

○ Downloaded data from the Amazon Cloud Database for detailed display by the app.

○ Worked with the development team to create appropriate cloud solutions for client needs.

○ Developed the presentation layer using **JSP, JSTL, HTML, XHTML, CSS** and client validations **JavaScript.**

- Used **Backbone framework** for connecting API's which enforces the communication to the server.
- Worked closely with Photoshop designers to implement mock-ups and the layouts of the application using **HTML5, CSS3, JavaScript and NodeJs.**
- Debug the application using **Firebug** too traverse the documents and manipulated the nodes using **DOM** and **DOM functions.**
- Developed and designed internet web applications and wrote application level code to interact with **APIs** using **AJAX, JSON** and **XML.**
- Created images, logos and icons that are used across the web pages using **AdobePhotoshop** and **SVG, Adobe Illustrator.**
- Active involvement in designing and developing real-time projects/enterprise applications.
- Being aware of cross browser compatibility and working with various browsers and browser versions.

Environment: HTML4.0/5, CSS3, JavaScript,KARMA, JQuery, AJAX, APACHE, Angularjs-2,Tomcat Apache, JSON, XML, XHTML, PHP, SQL,NodeJs,Backbone Adobe Dreamweaver, Twitter bootstrap, Angular2, Adobe Photoshop and MS Office.

Confidential

web Developer

Responsibilities:

- Worked in a team involved in developing the UI pages using **HTML, CSS, JavaScript, JSON, jQuery, AJAX**
- Designed the mockups and layouts of the application with the help of Photoshop designers.
- Used **HTML, CSS, AJAX** controls and **XML** in the development of Web pages.
- Integrated the service call with UI using http and resources which are substitutes for **AJAX** in angular.
- Utilized various **JavaScript** and **jQuery** libraries, **AJAX** for form validation and other interactive features.
- Involved in designing and developing the **JSON, XML Objects with MySQL**.
- Used **Ajax**, **JSON** to send request to the server to check the functionality of the websites.
- Testing the website on multiple browsers with their old as well as latest release.
- Used **JSON** for storing and exchanging information between browsers and servers.
- Using complex Object-Oriented concepts in improving the performance of the websites.
- Involved in writing the Properties, methods in the Class Modules and consumed web services
- Used JavaScript for **custom client-side validation**.
- Involved in designing and developing the GUI for the user interface with various controls.
- Worked with View State to maintain data between the pages of the application.
- Performed **Unit Testing**.

Environment: HTML, CSS, JavaScript, Angular JS, XML, DOM, Eclipse, SQL, Windows XP/07 and MS Office.
